OBJECTIVE

Full-stack & blockchain developer with international hackathon wins (ETHGlobal Prague, ETHRome). Built applications using React, React Native, and Node.js with blockchain integration. Experience with smart contracts, RESTful APIs, and technical team leadership.

TECHNICAL AND PROFESSIONAL SKILLS

Programming Languages: C, C++, Java, Python, Html/CSS, JavaScript/TypeScript, Solidity, SQL

Blockchain & Web3: Ethereum, Smart Contracts, Hardhat, Wagmi, Ethers.js

Web & Mobile Development: React, React Native, Next.js, Node.js, Express.js, Tailwind CSS, Expo

Tools & Databases: Docker, Git/GitHub, Linux PostgreSQL, MongoDB, Firebase, Prisma ORM

Concepts: Object Oriented Programming, Data Structures, Algorithms, Blockchain, Smart Contracts

Language proficiency: Turkish (Native), English (B2)

I am a quick learner with excellent adaptability in dynamic, team-oriented environments, capable of efficiently managing multiple tasks and meeting tight deadlines

EDUCATION

Gebze Technical University – Kocaeli / Gebze

Computer Engineering (100% English)

2022 - Present

- GPA – 3.08 out of 4.00 | Completed Credits: 144 ECTS
- YKS National Exam: Top 0.4% (9,730th / 2.5M students)

EXPERIENCE

GTU Blockchain Student Society - Software Team Vice President

2024 – Present

Lead technical team developing blockchain applications; won prizes at 4 international/national hackathons. Deliver Git/GitHub and smart contract development workshops. Mentor junior developers and oversee technical project development across multiple teams.

Racfathers – Part-Time Full-Stack Developer

June 2025 – Feb 2026

Developed web applications with Web3 integrations using React, Express.js, and Prisma ORM. Built scheduled backend services for periodic tasks and automated processes. Implemented RESTful APIs and database operations with PostgreSQL

SELECTED PROJECTS & ACHIEVEMENTS

PayTak – Blockchain Based Ride-Sharing Mobile App | University Course Project

- Led 5-person team as Project Manager & Scrum Master developing full-featured mobile application.
- Implemented Ethereum smart contracts for secure payment staking with automatic fund distribution.
- Built web admin panel and managed complete deployment (APK builds, domain setup, hosting)

Tech: React Native, Expo, Express.js, PostgreSQL, Solidity, Google Maps API, Firebase, Prisma ORM

ChronoTrade – Decentralized Time-Exchange Platform | ETHGlobal Prague 2025 Winner

- Won Blockscout Big Explorer Pool Prize at international hackathon with 800+ participants
- Built platform enabling users to trade skills/services using TIME tokens (1 TIME = 1 hour)
- Implemented ERC-20 token standard, smart contract escrow system, and reputation tracking

Tech: Solidity, Hardhat, React, Wagmi, Ethers.js, Blockscout

BitBrawlers – NFT Pet Battle Game | ETHRome 2025 Prize Winner

- Won prize from ENS, track at international blockchain hackathon
- Developed blockchain game where players mint NFT cats, level them up, and battle other players
- Integrated ENS for custom subdomain naming (e.g., shadow-warrior.deployer.eth)

Tech: Solidity, Polkadot, ENS, Scaffold-ETH 2

Rac'fella – AI-Powered Mental Health Assistant | ETHIstanbul 2025

- Developed privacy-first AI platform combining Cognitive Behavioral Finance Therapy with blockchain
- Implemented emotion tracking and intervention algorithms ensuring data privacy through decentralization

Tech: React, Blockchain, AI/ML, Privacy-Focused Architecture

VOLUNTEER EXPERIENCE / COMMUNITY SERVICE

- I participate in meal distribution and support the reintegration of homeless individuals through ÇOTUN (Çorbada Tuzun Olsun Association) whenever available.
- I visit Tuzla KASEV nursing home and conducted activities with elderly residents.
